<b>Current role</b>	Frontend developer at ELVIB - ComCom Austria and Frontend Developer at Freelance
<b>Experience</b>	Communication, Events
<b>Technologies</b>	AngularJS, CSS, TypeScript, JavaScript, Git, REST API, React, Bootstrap, Next.js, Redux

## I'm excited to work for a fast-growing company because...

I get the push I need to learn and do more for myself and for the organization I am working with!

## Work experience

### Frontend developer, [ELVIB - ComCom Austria](#) 🏢

Apr 2023 - Present (1y 9m)

Comcom is a video call platform for deaf and non deaf people  
Communication

AngularJS CSS TypeScript JavaScript Git REST API

- I joined as the first frontend developer
- I built and corrected the application's interface and functionalities without supervision
- The application is hosted for demonstration while the work is still in progress.

### Frontend Developer, Freelance 🏢

Aug 2020 - Present (4y 5m)

React AngularJS JavaScript Bootstrap Next.js Git REST API

- Worked on various projects including Fitness App, Food Recipes App, To-Do App, and Portfolio using React.js, MUI, and JavaScript.
- I have also worked as a freelancer
- I mentor and direct those who are interested in joining the tech space but confused as to how to go about it.

### Frontend developer, [MyEventPod](#) 🏢

Nov 2022 - May 2023 (6m)

MyEventPod is an event planning app for vendors and hosts.  
Events

React CSS TypeScript Redux JavaScript Next.js Git REST API

- I joined as a frontend developer and I helped in building the application to full functionality.
- The platform is currently in use and generates revenues.
- I was able to learn a whole lot as that was my first major live project.

# Education

Upper Credit in Urban and Regional Planning

# Snippets

## Portfolio ify-ihuoma-portfolio.netlify.app

In this my personal portfolio showcases some of the wonderful projects I had built and some of the ones I build for clients. I can say that in all of these projects, I learned different lessons from diligence to new skills. I however used HTML, CSS, Scss, JavaScript, Bootstrap, React, Angular, Next js, Git, GitHub, GitLab, Redux Tailwind Css and Material UI. All of these are listed on a section of my portfolio. I hope to work with you soon!

# More about me

## I'm excited to work for a fast-growing company because...

I get the push I need to learn and do more for myself and for the organization I am working with!

## Interests

I have a huge interest in cyber security and devops.
